Agenda

- Introductions
- BBM Update
- Communications Update
 - Topics
 - Checkin about notes: open up October and November version of Notes and clarify the difference
- GSP Website Update
- Public Input: Open House in March?
- Options for GSPs in the Solano Subbasin
 - Reminders: First Acknowledge, then understand, then agree. Check out your assumptions.
 - Walk through backwards: from Multiple GSAs to a Single GSA
- Next Meeting-January 17th 1:00-3:00

Meeting Highlights

1. Dave Robinson, Northern Delta GSA Chair; Daniel Wilson, ND GSA Director; and Harvey Correia RD2067 and Vice Chair of the NDGSA joined to observe a meeting and get a sense for the Collaborative. They offered input during the discussion on public input events and stayed after the meeting to ask questions as they decide on next steps for their involvement in the Northern Delta GSA.

2. We discussed the recent draft basin boundary modifications released by DWR. Yolo GSA and Sacramento GSA's applications were both accepted. Neither change will directly impact the Solano Subbasin GSP development process.
 - a. DWR did not accept the Northern Delta GSA's BBM application because not all individual agencies within the basin boundary were consulted. The ND GSA will continue to participate in the Solano GSP process as a member of the GSA Collaborative while they assess options for moving forward with the modification application.
3. We heard from Ag Innovations and Chris Lee with communications updates. The next email post will be going out in January 2019 and will likely focus on the general GSP development timeline. The Solano GSP website will be ready for Collaborative members to review and offer feedback by the week of January 7 with a goal of going live by the week of January 17.
4. We discussed possible options for public input in Spring 2019 and pros and cons of offering a public workshop. We decided that, given the options available, a series of educationally focused open house events in March would be the best approach for stakeholder engagement.
5. We had a high level discussion about the advantages and disadvantages to a future with one GSP, two GSPs, or more GSPs, in order to develop working agreements that support multiple scenarios. We will have a more in depth conversation about these options at the January Collaborative meeting when all members can be present.
